Let's cooperate!

- ✓ Complete service
- ✓ Refill
- ✓ Reporting
- ✓ Remote control of dosing

Monthly rental including filling for 20 000 uses.

Power options

Solar power supply
Built-in battery charged by solar connector- use in space with access to light

Battery
The battery is replaced together with supplementing desinfection in areas without direct light

Power supply
220V connection

Key benefit:
Remote control of dosing
thanks to data connection

ANTIK SMART CONTACTLESS DESINFECTION STAND

Basic reporting options

- SMART desinfection stand allows data connection (4G, LoRaWAN or NB-IoT)
- Precise positioning of the stand
- Possibility to request for online configuration (dose size, setting time, possibility of blocking)
- Lack of desinfection report
- Vandal notification (shock sensor)
- Integrated outdoor temperature sensor
- Statistics and database every hour- the exact number of desinfection doses per stands, days and hours
- Monthly report of individual stands sent to clients

Possibility of expansion with additional modules and sensors

- Air quality CO2, dust parts PM2.5, PM10, VOC
- Noise level
- Lighting level
- Possibility of camera integration and connection to WIFI AP
